

Available Immediately: Senior Scientist or Research Scientist, Formulations and Drug Delivery

Job Description

A Senior Scientist or Staff Scientist position in nanoparticle based drug delivery and formulation science is available immediately at Inimmune Corp as part of an interactive multidisciplinary research team focused on the discovery and development of vaccine adjuvants and immunotherapeutics in Missoula MT. This is an excellent opportunity to join a world-class multidisciplinary research and development team that is well funded and has strong connections in both academia and industry. Ideally, we are looking for highly motivated candidates with a strong working knowledge of drug formulation and delivery, pharmaceutical science, organic and analytical chemistry, nanoparticle technology, with a solid understanding of biochemistry or biological systems.

Inimmune Corp is an Affirmative Action/Equal Opportunity employer and has a strong institutional commitment to the principle of diversity in all areas. In that spirit, we are particularly interested in receiving applications from a broad spectrum of qualified people who would assist our company in demonstrating its essential values of innovation and creativity, impact, openness, and partnership.

Position Details

- Based on the successful candidate's experience and qualifications, the position may be hired at the Research Scientist or Senior Scientist level.
- Position is full-time, 1.0 FTE, and includes a comprehensive and competitive benefits package including Insurance package, 401k, and stock options.
- Starting salary for this position is dependent on experience and qualifications but will be in the range of \$58k-85k per year depending on the level hired at.

Required qualifications and responsibilities for each level:

Research Scientist

- Bachelor of Science + >7 years lab experience or MS and >2 years lab experience.
- Designs and executes a wide range of experiments with minimal or no supervision.
- Effectively reviews scientific literature independently and implements new technologies and assay systems into laboratory.
- Performs complex data management and analysis with minimum oversight.
- Prepares detailed verbal or written summaries of results with interpretation for manager and/or project teams.
- Presents effectively at internal and external research group meetings.
- Responsible for effectively sharing relevant scientific information with manager and colleagues.
- Coordination of the efforts with technical and scientific staff to achieve project objectives and milestones. Technical expert on one or more laboratory systems.

Senior Research Scientist

- MS and >6 years lab experience or a Bachelor of Science + >10 years of experience
- Has theoretical, practical and technical scientific knowledge of an entry level PhD scientist with exceptional technical competencies.
- Oversee day-to-day operations in laboratory.

- Designs and executes a wide range of experiments independently and proactively incorporates new technologies into practice with minimal or no supervision and conducts trouble shooting activities to mitigate risk.
- Performs complex data management and analysis with minimum or no oversight.
- Prepares detailed verbal or written summaries of results with interpretation and informed recommendations for manager and/or project teams.
- Writes specific technical sections of internal and external reports and SOPs with limited supervision.
- Occasionally assists in grant and manuscript writing with limited input from supervisor.
- Presents effectively to internal and external meetings.
- Responsible for sharing relevant scientific information from internal and external meetings with appropriate colleagues.
- Established networking skills through interactions with scientists outside of primary project roles.
- Initiates coordination of the efforts of technical and scientific staff to achieve project objectives, and milestones.
- Trains incoming and/or junior scientists on instrumentation and methods

About Inimmune

Inimmune was formed from an experienced, close-knit team of biotech/pharmaceutical industry professionals. This team of chemists, immunologists and formulation scientists have been at the cutting edge of innovation for over 10 years as former GSK Vaccines scientists and investigators. They now are working to create new immunotherapies directed at making meaningful and lasting clinical impacts in the areas of allergy, autoimmunity, infectious disease and cancer. Through its technology, assets, expertise and favorable IP positioning, Inimmune is poised to stand up and become a leader in the fields of immunotherapy, infectious disease and immuno-oncology. Inimmune is headquartered in beautiful Montana. It is located in Missoula, a culturally vibrant community of about 70,000, surrounded by mountain grandeur which was recently ranked in the *"top 20 best college towns with a population of less than 250,000"* by the American Institute for Economic Research and ranked 9th in Outside Magazine's *"The 16 Greatest Places to Live in America"* in 2014. Many national publications recognize Missoula for its high *quality of life*. Abundant recreational opportunities in surrounding state and national forests and nearby Glacier National Park and Yellowstone National Park complement a thriving intellectual atmosphere.
