

Chief Medical Officer – Inimmune

Location: [Missoula, MT] or remote | Full-Time or Fractional | Competitive Compensation & Benefits

About Inimmune

Inimmune is a pioneering biotech company dedicated to harnessing the innate immune system to treat and prevent disease. Our lead clinical program is a disease-modifying therapy for seasonal allergic rhinitis that targets TLR4 to reprogram the immune response against environmental allergens. Building on our expertise in immunomodulation, we are also advancing a pipeline that includes an oncology immunotherapy targeting TLR 7/8 and future clinical vaccine programs.

The Opportunity

We are seeking a **Chief Medical Officer (CMO)** to provide strategic and operational leadership and execution oversight of Inimmune's innate immune focused clinical development programs, with indications in Allergy and Oncology. The ideal candidate should bring deep domain expertise in Immunology and Inflammation with experience in designing late-stage clinical trials in Allergy and Oncology preferred. Experience with vaccines and vaccine development is a plus.

Key Responsibilities

- **Clinical Development Strategy and Execution**
Develop and execute on the overall clinical strategy for immune focused clinical development programs. Lead strategic portfolio decisions in consideration of overall company goals and funding considerations
- **Clinical Trial Operational Execution and Oversight**
Design, implement and monitor clinical trials, ensuring they meet regulatory, ethical and scientific standards.
Manage virtual clinical team including third party vendors to maintain timelines that remain on budget
- **Regulatory Collaboration**
Collaborate with regulatory agencies (FDA, EMA, etc.) to advance clinical programs in seasonal allergic rhinitis and oncology..
- **Medical Affairs and key Stakeholder Engagement**

Collaborate with key opinion leaders, investigators, and external partners to fill knowledge gaps, design trials and facilitate patient recruitment, site selection and trial execution.

- **Cross-Functional Collaboration**

Work closely with the internal executive team and across line functions to align clinical strategy with overall business goals.

- **Portfolio Program Prioritization and Ongoing Program Support**

Provide high-level guidance and strategic direction for our all therapeutic intent programs. Adding clinical view on vaccine adjuvant programs a plus.

Qualifications

- M.D. or equivalent degree with board certification in allergy/clinical immunology strongly preferred. Experience in oncology desired and working knowledge of vaccinology is a plus.
- Demonstrated success strategy, development, and execution across all phases of clinical development
- Proven successful track record of interactions with US and ExUS regulatory agencies (eg FDA, EMA, TGA) and experience leading successful global regulatory filings.
- Excellent leadership, communication, and strategic decision-making skills.
- Demonstrated ability to work well in an integrated and collaborative team environment
- Ability to form and lead successful multi-disciplinary teams

Why Join Inimmune?

- Be part of the executive team that is bringing novel, disease-modifying therapies to patients
- Lead the clinical strategy of a growing biotech company with a groundbreaking approach to innate immunotherapy.
- Work alongside a passionate and innovative team dedicated to improving patients' lives.
- Competitive salary, equity options, and comprehensive benefits package.

If you are a visionary clinical leader eager to shape the future of allergy treatment, we'd love to hear from you!
